

The Zombie Apocalypse and Other Manifestations of Dystopia

Manifestations of Dystopia – Part 1

M. G. "Oggi" Cohen
Identifying Reality for 80 Years

The difference between Conspiracy Theory and Conspiracy Reality is about six months.

In seeking to Identify Reality, it is this Writer's policy to consider all alternatives that are not observably metaphysically impossible. This approach may give undue time or attention to unlikely scenarios, but it is less likely to reject or overlook the strange but true.

Disclaimer: This Writer claims no Special or Secret Knowledge; and has not Received nor Sought the Imprimatur of any Group or Authority, be it Medical, Political, Religious or Otherwise.

Seems Like Forever Since...

Pandemic warnings were broadcast. Travel restrictions were imposed. PCR tests detected a novel virus infection, even in asymptomatic people. Hospitalized elderly nursing home residents were ordered returned to their nursing homes, where they and other elderly residents died. Early at-home treatment was discouraged. For those who became seriously ill, only a single in-hospital treatment protocol was authorized; most patients died. Lockdowns, masking, and social distancing were initiated and mandated. And so on...

In [Glorious Health, Concerned for Your Safety, Part 1](#) (May '22), various observations and opinions (videos and written articles) were presented to examine several of the manifestations of the current world crisis; in health, economics, and politics. These have been derided by some as conspiracy theories, or mere coincidences; but in the fullness of time, we might see, if we are willing to look, a different reality, which just might be the Reality.

What's Going On Here?

A certain, possibly novel virus, first reported as originating from a bat in a Chinese "wet" market (a food market selling live animals killed on the spot) – became an experimental virus accidentally released from a Chinese bioweapons lab – then became a Chinese bioweapon released intentionally to attack the U.S. – then became a bioweapon under development in a U.S. bioweapons lab but sub-contracted to the Chinese bioweapon lab to bypass a U.S. moratorium – and then became the first part of a two part (or three or more part) bioweapon deployed by certain Global Elites to depopulate planet Earth by 95% and make the surviving 5% trackable and controllable – and finally, to facilitate the elites in transitioning themselves into artificially-intelligent cyborgs, all to impose the New World Order, a modern, high-tech feudal system to serve that same, self-anointed, soon to be cybernetically immortal, trans-human, Elite.

But wait, there's more! Maybe the New World Order is just a cover story. Why the great worry about Climate Change (previously called Global Warming, and before that, Global Cooling)? Why advocate and execute Carbon Sequestration, which directly injures all plant life on Earth by reducing photosynthesis (sunlight plus carbon dioxide plus chlorophyll yields plant growth and oxygen), which in turn, injures all animal life, first the herbivores by reducing their food supply (plants) and oxygen, and then the carnivores and omnivores (which includes humans) by reducing their (our) food supply (plants and

herbivores) and oxygen? Also, what about those chemtrails, the tons of poisonous dust dumped in the air, dimming the sunlight, and then falling out everywhere on the planet? Is this all just accidentally destructive pseudo-science by misguided humans, or could it be part of re-engineering (terraforming) planet Earth to make it ready for invasion and takeover by space aliens with different environmental requirements? Are the space aliens already here, or are they on their way (at warp speed) from a galaxy far, far away, or maybe just a nearby solar system with a dying sun? Are our global elites selling the rest of us out in exchange for a place in the alien future, or are they themselves reptilian shapeshifters, just doing their duty to prepare Earth for population by their own species?

Don't believe any of it? That's Ok. Skepticism is good (but willful ignorance, not so much). First, look it all up; but skip Google, use DuckDuckGo instead; skip YouTube, use BitChute, Rumble, and Brighteon instead; and skip the so-called fact checkers (unless you prefer your search results to be manipulated and biased). Evaluate what you find, using your own judgement. Second, mark the above paragraphs, and those following, where you think the narrative has strayed into tin hat territory. Come back to it in a few months or a year and mark them again. Ask yourself, has anything changed? And, if it has, why?

Returning to the relatively mundane: How lucky we were that there was a PCR test to check for the novel virus in people before they had any signs of infection, so they could be treated before they got sick; but how sad that so many people who were treated before they got sick, then got sick, and even died. And how ironically fateful was it that the inventor of the PCR test, who had stated absolutely that the test was not suitable for diagnosing disease, recently had died. And wasn't it creative of the labs running the PCR tests to run the tests at 40 to 45 cycles of amplification to make sure not a single "case" would be missed, even though the specifications for the test clearly stated that amplification over about 24 to 28 cycles would give false positives (about 97% false positives if over 35 cycles). And how odd that inexpensive and widely available medicines with a 65-year or longer efficacy and safety record were declared to be ineffective and even dangerous when used to treat the novel virus (even though Doctors who prescribed them anyway were routinely reporting miraculous cures); but how wonderful that a new medicine costing more than \$1,000 per patient, and ventilators cobbled together at warp speed just for the public health emergency, suddenly were available for all the people who PCR-tested positive; but how sad that most of those treated with the expensive new drug and with the new ventilators died.

And special thanks to the medical establishment and the governments of the World for the lockdowns (which destroyed the middle class), the mask mandates and social distancing, (which accelerated the conditioning of humans, begun with children in kindergarten, to suppress their natural unalienable independence, and submit to authority) and, most of all, for the creation at warp speed of the new, technocratic, shots in the arm – which actually had been invented and patented already – when plans for the New World Order and the Great Culling (Agenda 30) were just a twinkle in the All Seeing Eye of the global elites.

The Plan, and their motivations for it, have been proudly confessed and published by the perpetrators, the process gamed and rehearsed, the equipment produced, and the logistics settled. The plan has been 50 years in the making (that we know of). A whistleblower has stated that it is at least 250 levels deep. Imagine: a 250-level Gantt chart for the destruction of humanity. What a brilliant accomplishment! Evil, psychopathic, and sociopathic, but brilliant!

LIVE spelled backwards is EVIL. There is no compromise possible. Sooner or later, we must, each of us, choose to live, and act to defend humanity. Sooner would be better than later. "The only thing necessary for the triumph of evil is for good men to do nothing."

- Author unknown, attributed to Edmund Burke, 1790.

The Art of Invisible Killing

The *piece de resistance* of Mr. Global's plan, at least so far, has been the so-called vaccines; *so-called* because they fail to meet the traditional function and definition of a vaccine, to produce immunity to a disease, and because the definition of *vaccine* was changed to accommodate that failure when the gene-modifying experimental inoculation was rolled out (to preserve the special liability shield provided only to makers of vaccines).

It has become obvious that these "vaccines" are part of a multi-step bioweapon. They are "safe and effective" only in the context of their intended purpose: They are safe for the perpetrators of democide because they can be administered, without resistance, to fearful and trusting victims. They are effective for the purpose of democide because they sicken and kill recipients without alerting the targeted population to the danger, due to the adverse effects being mostly delayed and varying according to the prior health of the victims.

Poison disguised as a vaccine is a diabolical deception, like the fake bars of soap handed to the Nazis' Holocaust victims as they were guided into the disguised-as-showers gas chambers.

Depopulation in Real Time...

Pandemic warnings are broadcast. Travel restrictions are imposed. Misuse of PCR tests misidentifies seasonal flu as infection by a novel virus. Elderly patients in nursing homes are intentionally exposed to other sick patients, many die. Early outpatient treatments with safe and effective medicines are prohibited. Lockdowns, masking, and social distancing are initiated. Government rules and financial incentives to hospitals result in any deaths occurring within two weeks of a positive PCR test being classified as a death from the novel virus, regardless of the actual reason for hospitalization or the actual cause of death. A dangerous in-hospital treatment protocol is mandated, killing most patients put on it, from kidney failure, lung damage, dehydration, and malnutrition, within two to three weeks. Though not completely trialed, all the new-technology "vaccines" receive emergency use authorizations (EUA). Government mandating of inoculation with unapproved vaccines is illegal, so many governments order private companies to mandate the shots for their employees. This is also illegal but, panic having set in, many comply. Employees who decline are bullied and fired. Vaccinated patients begin to suffer adverse events (including sudden death), described by authorities as "very rare" or blamed on "breakthrough". Statistical analyses show that the illnesses are being caused by the "vaccines", but this information is suppressed. Government spokespersons, the mainstream media, and many social media shills, press the fallacious idea that the unvaccinated are a danger to the vaccinated. Independent Doctors and other experts explain how and why the opposite is true. Social friction increases. Many begin to discern that the fear-producing events leading up to the roll-out of the "vaccine" were staged to scare and compel as many people as possible into lining up for the shot, which in reality is a delayed-action kill shot for implementing the global depopulation agenda. Despite overwhelming reveals of the shot's purpose by

word of mouth and on the internet, most people choose to believe the official narratives and continue to get inoculated and then boosted. Many become deathly ill, some within minutes or hours, and many die. Few people step out of line, even when someone ahead of them gets the shot and drops dead before their eyes. The shots are discovered to cause hundreds of serious adverse events, in tens of thousands of people, including auto-immune deficiency syndrome (AIDS), various cancers (by attacking cancer-suppressing genes), myocarditis, pericarditis, and cerebral hemorrhage (by micro-clotting of the blood), male and female infertility, a huge increase in miscarriages and stillbirths, and truly horrible birth defects. (Is this why there are laws being proposed to permit "post-birth abortion" for a month after birth?) And recent reports suggest that "gene-silencing" by the "vaccine" will cause (until now rare congenital) brain damage, characterized by behavior reminiscent of movie zombies, including the unsteady gait, impaired cognition, and biting.

Seriously, I'm not making this up, and I dislike writing about it as much as you dislike reading about it, but reality and zombies bite, and we will have to deal with it...

Are We Done Yet?

Probably not. Whether the perpetrators of the disaster are arrogant self-brainwashed trans-humanist sociopaths and psychopaths, or the remnants of a cruel ancient cult of child-sacrificing cannibals with delusions of aristocracy, or both, it appears they are not yet done with their catastrophic agenda. How can we tell? By paying attention: because their code, whatever it is, makes them telegraph their plans. They publish books and papers, give prophetic interviews and talks, position their investments, execute their already locked and loaded programs, and then collect their plunder and gain their reputations as predictive geniuses. So, how close are they to being done?

What else, besides the pandemic, has been predicted? What's already started?

- Supply-chain problems ✓
- Spiking fuel prices ✓
- Diesel fuel shortages ✓
- Food shortages ✓

And what's being warned about?

- The next pandemic (Monkey Pox, or ??) ✓
- Surveillance and Control (5G) ✓
- Firearms confiscation ✓
- World War III (nuclear) ✓
- Invasion from outer space ✓

And what's to be done about it?

Don't be Quiet. Be the Resistance! ✓
